IDENTIFIERS	*Texas

ABSTRACT

This annual report provides information about dropouts in Texas public schools. The report includes historical dropout information; a summary of dropout rates based on school district characteristics; a listing of dropout rates broken down by county, district, and campus; and national comparative data. The findings show that in 1996-97, a total of 26,901 students in grades 7-12 dropped out of Texas public schools. Statewide, the annual dropout rate was 1.6 percent, a slight improvement over the 1995-96 annual dropout rate of 1.8 percent. An examination of the characteristics of these dropouts and their education programs reveals that more than 80 percent of the students who left school were overage for grade. Males were more likely to drop out than females, and Hispanics made up the greatest number of dropouts. The largest number of dropouts was found in 9th grade, whereas the highest dropout rate was found among 12th-graders. Fewer than 40 percent of the dropouts were identified as at risk of dropping out of school the year they dropped out. Reasons cited for dropping out included poor attendance, entering non-state-approved GED programs, and pursuing a job. At the district level, dropout rates tended to vary based on factors such as community type, enrollment, and student performance. (RJM)

Highlights

How many students drop out?

- In 1996-97, a total of 26,901 students in Grades 7-12 dropped out of Texas public schools.
- Statewide, the annual dropout rate was 1.6 percent, a slight improvement over the 1995-96 annual dropout rate of 1.8 percent.
- The estimated longitudinal dropout rate of 9.1 percent represents a decrease of 1 percent from the previous school year.

Who drops out and why?

- More than 80 percent of dropouts were overage for grade.
- On average, males dropped out at a higher rate than females.
- Hispanics made up the largest proportion of dropouts (51.5%), followed by Whites (29.4%).
- Reasons cited for leaving school included poor attendance, entering non-state-approved GED programs, and pursuing a job.

Are they leaving certain districts?

- School districts with the largest enrollments (50,000 or more students) had the highest average dropout rate, at 2.1 percent.
- Generally, districts with lower student passing rates on the Texas Assessment of Academic Skills (TAAS) had higher dropout rates.

How do we compare nationally?

- Based on the Current Population Survey, 5 percent of students in Grades 10-12 dropped out of school across the nation.
- Texas had the second lowest dropout rate out of 29 states that met required Common Core of Data collection standards for school year 1994-95. Only North Dakota outperformed Texas on this measure.

Report on Texas Public School Dropouts — 1996-97

Executive Summary

A total of 26,901 Texas public school students in Grades 7-12 were reported to have dropped out in 1996-97. This represents a statewide annual dropout rate of 1.6 percent, a slight decline from the 1995-96 rate of 1.8 percent. The estimated longitudinal dropout rate also changed, dropping 1 percent from the previous school year to 9.1 percent. One of the objectives of public education is that, through enhanced dropout prevention efforts, all students will remain in school until they obtain high school diplomas (TEC §4.001). The target set in law is to reduce the annual and longitudinal dropout rates to 5 percent or less by the 1997-98 school year (TEC §39.182).

An examination of the characteristics of 1996-97 dropouts and their education programs reveals that more than 80 percent of the students who left school that year were overage for grade. Males were more likely to drop out than females, and Hispanics made up the greatest proportion of dropouts. The largest number of dropouts was found in ninth grade, whereas the highest dropout rate was found among 12th graders. Fewer than 40 percent of 1996-97 dropouts were identified as at risk of dropping out of school the year they dropped out. Some reasons cited for dropouts leaving school included poor attendance, entering non-state-approved GED programs, and pursuing a job.

At the district level, dropout rates tend to vary based on characteristics such as community type, enrollment, and student performance. For example, urban school districts with large student enrollments and other central city districts generally had the highest dropout rates in 1996-97. Districts with lower student performance on the Texas Assessment of Academic

Skills (TAAS) test had higher dropout rates on average than high-performing districts.

Nationally, the annual dropout rate for students in Grades 10-12 was an estimated 5 percent, representing almost one-half million students. As in Texas, Hispanic students had the highest dropout rate in the country.

To provide a basis for state-by-state comparisons, the National Center for Education Statistics (NCES) developed a definition of "dropout" that could be adopted and implemented by all states. Through the Common Core of Data collection, 29 states and the District of Columbia submitted data that met quality and comparability standards required to publish state estimates for 1994-95. Texas, at 2.7 percent, had the second lowest dropout rate. This rate was higher than the reported state rate of 1.8 percent, primarily due to differences in the dropout definitions and methodologies used by NCES and the State of Texas. Other rates that year ranged from a low of 2.5 percent to a high of 10.6 percent.

Preface

This annual report provides information about dropouts in Texas public schools. Updated for the 1996-97 school year, the report includes historical dropout information; a summary of dropout rates based on school district characteristics; a listing of dropout rates broken down by county, district, and campus; and national comparative data.

Dropout Definition, Data Collection, and Methodology

After the end of each school year, districts report dropout information for Grades 7-12 through the Public Education Information Management System (PEIMS). Under the *PEIMS Data Standards* (TEA, 1997b), students in Grades 7-12 are dropouts if they (1) are absent without approved excuses or documented transfers and do not return to school by the fall of the following school year, or (2) complete the school year but fail to reenroll the following school year.

Students in the following categories are identified as dropouts in the state's integrated accountability system:

- A student identified under the preceding definition
- A student who leaves school to enter the military before graduation
- A student from a special education, ungraded, or alternative education program who leaves school
- A student who leaves school and enters a program not qualifying as an elementary/secondary school (e.g., cosmetology school)
- A student enrolled as a migrant, whose whereabouts are unknown

Students in the following categories may be reported through PEIMS but are not included in the dropout count:

- A student who dies
- A student who drops out before the seventh grade
- A student who is out of school for a temporary period with an approved excuse
- A student showing regular attendance at a state-approved alternative program
- A student enrolled as a migrant who subsequently has a school enrollment record (i.e., a New Generation System (NGS) education record is available)
- A student known to have transferred to another public school, an adult or alternative education program, or home schooling
- A student who moves to another grade level
- A student who leaves school to enroll in college early
- A student transferred or assigned to another public institution or state-approved educational program
- A foreign student who leaves school to return to his or her home country

In 1990-91, the Texas Education Agency (TEA) began an automated statewide recovery of reported dropouts. The dropout recovery process removes a dropout from the number submitted by a school district if the reported dropout:

1. has remained enrolled in public school somewhere in the state, according to the school district attendance and enrollment information provided through PEIMS;
2. has received a GED certificate and appears on the GED information file at the time recovery procedures are executed;
3. has graduated within the last year;
4. was expelled for criminal behavior occurring on school property or at a school-related function and was incarcerated;
5. was identified as a dropout at any time back to the 1990-91 school year. A student will be counted as a dropout only once in his or her lifetime, even if the student drops out repeatedly. First-time dropout identification applies to dropouts reported since the 1990-91 school year, the first year that student identification data were collected along with the dropout record;
6. met all graduation requirements but did not pass the exit-level TAAS test;
7. withdrew to return to his or her home country;
8. was attending an approved alternative program; or
9. withdrew to attend college.

In 1996-97, the recovery process identified 16,167 students who were not included in the final dropout count. Table 1 presents the number and percentage of dropouts recovered for each reason.

Currently, the annual dropout rate is calculated by dividing the number of dropouts by cumulative enrollment in Grades 7-12. Cumulative enrollment is the count of all students reported in attendance during any six-week reporting period. If a student enrolls on several campuses during a school year, the student is counted in attendance at every campus on which he or she is enrolled. However, when aggregating dropout information, the student is counted only once at the campus, district, county, region, and state levels. Cumulative enrollment more closely parallels the number of dropouts counted for that entire school year. Although this rate is less comparable to the dropout rates reported before 1992-93, it provides a more accurate reflection of the dropout situation and more uniform data for comparison between districts and campuses.

An estimated longitudinal rate for Texas can be calculated by subtracting the annual rate as a percentage of 1.0 and raising the resulting retention rate to the sixth power. The retention rate is then subtracted from 1.0 for the final estimated longitudinal dropout rate.

Table 1. 1996-97 Recovered Dropouts by Reason

Recovery Reason	Frequency	Percentage
Moved to another district	3,438	21.3%
Enrolled into an approved alternative program	3,413	21.1%
Returned to home country	2,531	15.6%
Received a GED certificate	2,528	15.6%
Dropout in a previous school year	1,985	12.3%
Met all graduation requirements but failed Exit TAAS	1,782	11.0%
Expelled for criminal behavior	317	2.0%
Entered college	80	0.5%
Not ADA eligible	64	0.4%
Graduated	16	0.1%
Duplicate reporting	13	0.1%
Total Recovered	**16,167**	**100.0%**

Source: TEA PEIMS (1997-98)

One longitudinal measure of school success is the calculation of a completion rate, where the progress of students in a given cohort is followed across academic years through their expected graduation year. High school completion rates for 1995-96 and 1996-97 will be reported in the Academic Excellence Indicator System (AEIS) for the first time in 1998.

One of the advantages of reporting a completion rate is that it measures success rather than failure (i.e., dropping out). Completion rates should not be simplistically viewed as the complement of the estimated longitudinal dropout rate, however. As calculated for the integrated accountability system, completion rates are based on Grades 9-12; while the annual dropout rate is computed across Grades 7-12, and consequently so is the estimated longitudinal dropout rate. Further, completion rates are based on actual student progress through the Texas public education system, as reported in PEIMS; the estimated longitudinal dropout rate is only a calculated estimate. Until this year, the agency has not had the data required to compute actual longitudinal dropout rates across Grades 7-12.

State Dropout Rate

The total number of dropouts for the 1996-97 school year was 26,901. This represents a decline of over 2,300 students from school year 1995-96. As shown in Table 2, the 1996-97 annual dropout rate was 1.6 percent, a slight improvement over the previous year's rate of 1.8 percent. The estimated longitudinal dropout rate also changed, dropping a full percentage point to 9.1 percent.

As in past years, dropout rates among certain ethnic minorities remained significantly higher than the overall dropout rate. The annual dropout rate for Hispanic students in 1996-97 was 2.3 percent. African American students had a 2 percent annual dropout rate. Although their rates declined from 1995-96, these groups continued to have the highest rates among all ethnic groups. All other student groups had dropout rates that were lower than the overall state rate.

The estimated longitudinal dropout rates for Hispanic and African American students were also higher than the rates for other groups. The longitudinal rate for Hispanic students was 13 percent, while the rate for African American students was 11.3 percent. Achieving a longitudinal rate of 5 percent (a goal first established by the legislature in 1984) is still a significant challenge for these groups of students and the

Source: TEA PEIMS (1997-98)

educators working with them. Despite the high dropout rates, the total number of dropouts actually declined for all ethnic groups. The dropout rates by gender also are presented in Table 2. The male dropout rate of 1.7 percent was slightly higher than that for females (1.5%).

Table 2 also shows the dropout rates by grade level for the 1996-97 school year. At 2.5 percent, the dropout rate was highest among 12th grade students, followed by ninth graders at 2.3 percent. This represents a change from the previous year, when students in ninth grade dropped out at a slightly higher rate than 12th graders (2.7% vs. 2.6%). While both groups experienced declines in their dropout rates from one year to the next, the decrease was greater at the ninth grade level, resulting in a higher dropout rate in Grade 12. In terms of raw numbers, however, more students still dropped out in ninth grade.

Table 3 presents dropout rates for Grades 7-12 by ethnicity. Among Hispanic students, the dropout rate was highest in Grade 9. The highest rates for both Whites and African Americans were found in 12th grade.

Characteristics of Dropouts

Many factors have been shown to be related to student attrition. Basic demographic characteristics, family and personal background, a student's academic history, and characteristics of the student's school all may influence whether or not a student will stay in school. Table 4 and Table 6 (on page 10) each present a three-year history of Texas dropout information by various student characteristics. An ethnic profile of dropouts covering the last 10 years of available data is presented in Table 8 on page 15.

Table 4 indicates that, compared with their counterparts the year before, economically disadvantaged students in 1996-97 made up larger percentages of both total enrollment and total dropouts in Grades 7-12. Despite these increases, however, the

dropout rate for this group declined slightly to 1.6 percent, the same as the overall state rate.

Table 4 also shows dropout statistics for at-risk students. Under the Texas Education Code, §29.081, school districts must identify certain students as at risk of school failure or of dropping out. These include each student in Grades 7-12 who:

1. was not advanced from one grade level to the next for two or more school years;
2. is at least two years below grade level in reading or mathematics;
3. has failed at least two courses and is not expected to graduate within four years of entering ninth grade;
4. has failed at least one section of the most recent TAAS exam; or
5. is pregnant or is a parent.

These indicators, which concentrate on a student's academic history, may not identify those students at risk due to family and personal situations or school-related characteristics. As applied by school districts, the criteria resulted in 34.8 percent of students in Grades 7-12 being identified as at risk. Yet, only 39.4 percent of 1996-97 dropouts were identified as at risk of dropping out during the year they actually dropped out of school. Moreover, the dropout rate for at-risk students was just slightly higher than the overall state rate. Of students who graduated in 1996-97, more than one-fourth (27.8%) were identified as at risk of dropping out of school

Table 5. 1996-97 Texas Dropout Rates by Age

Information is available on the number of dropouts identified as overage for their assigned grade levels. Students who, at the time they drop out, are neither on grade level nor participating in special education programs usually have been retained in at least one grade. As Table 4 indicates, 80.6 percent of dropouts in 1996-97 were overage for grade, compared to 31.5 percent of all students in Grades 7-12. Table 5 on page 9 shows that, while dropouts that year ranged in age from 10 to 21, over 75 percent left at age 16 or older. Those 19 and 20 years of age had the highest dropout rates of the age range examined.

Table 6 presents dropout information for students receiving various educational services, including participants in special, bilingual, and vocational education programs. Although each of these groups represented larger shares of both total enrollment and total dropouts in 1996-97, their dropout rates continued to decline from previous years. For example, the rate at which special education students left school decreased from 2.1 percent in 1995-96 to 1.9 percent in 1996-97. Dropout rates for students in bilingual and vocational programs went down by 0.3 percent and 0.1 percent, respectively, during the same period.

Reasons for Dropping Out

School districts recorded reasons for leaving school for 58 percent of the 1996-97 dropouts (see Table 7). Of these 15,798 students, 55.5 percent were reported to have withdrawn because of school-related concerns, such as poor attendance or failing grades; 12.4 percent because of job-related concerns, such as pursuing a job or joining the military; 8.2 percent because of family-related concerns, such as pregnancy or marriage; and another 23.9 percent because of other concerns, such as drug- or alcohol-related problems, homelessness, or enrollment in a non-state-approved alternative program. Table 7 shows that 45 percent of dropouts left school because of poor attendance, though the reasons for poor attendance are not known.

The data also suggest some differences in the reasons males and females drop out of school. According to district reports, for instance, over two times as many males as females dropped out to pursue jobs. Females, on the other hand, were more likely than males to leave because of family-related concerns. About 8 percent of females were reported to have dropped out to get married, compared with fewer than 2 percent of males.

Table 7. Texas Top Ten Reasons for Leaving School, as Reported by School Districts for 1996-97

		Gender		Ethnicity			
Reasons for Dropping Out	**Total**	**Male**	**Female**	**African American**	**Hispanic**	**Other**	**White**
Poor attendance	**45.0%**	45.8%	44.0%	44.3%	40.9%	53.8%	51.2%
Enter alternative program, not pursuing diploma	**17.8%**	18.0%	17.4%	32.8%	15.2%	15.4%	13.4%
Pursue a job	**12.3%**	16.4%	7.1%	5.1%	14.9%	12.0%	12.3%
Low or failing grades	**6.8%**	7.4%	6.0%	3.0%	6.9%	3.8%	8.8%
Because of age	**5.0%**	5.2%	4.8%	6.5%	5.8%	5.8%	2.9%
To get married	**4.2%**	1.2%	7.9%	0.2%	6.8%	0.5%	2.7%
Pregnancy*	**4.0%**	—	8.4%	2.7%	4.7%	1.0%	3.6%
Failed exit TAAS/not met all graduation requirements	**1.8%**	1.6%	2.2%	2.4%	1.9%	3.4%	1.4%
Expelled, non-criminal behavior	**1.8%**	2.6%	0.7%	2.1%	1.6%	2.4%	1.7%
Homeless, or non-permanent resident	**0.8%**	0.6%	1.1%	0.4%	0.8%	1.0%	1.1%

District Characteristics

Texas school districts can differ greatly with regard to characteristics such as community type, district size, student performance, and expenditures. In turn, these district-level characteristics may relate to the dropout rates for individual campuses. Appendix A includes a list of dropout rates by district characteristics.

Generally, school districts are grouped into eight categories based on the types of communities in which they are located. Charter school districts, however, constitute a separate category. Factors such as proximity to a metropolitan area, size, and growth rate are used to determine the appropriate category for each district. (For a complete list of community types and their definitions, refer to Appendix A.) Dropout rates tend to be higher in school districts located in urban areas, and lower in rural and nonmetropolitan fast growing areas. One factor in this variation may be that both minority students and economically disadvantaged students are found in greater numbers in the urban areas, and these students are already known to drop out of public schools at higher rates than their nonminority and wealthier peers.

Higher dropout rates are also found among districts with the largest enrollments, most of which, again, are located in urban areas. Appendix A shows that, in 1996-97, districts with student enrollments over 50,000 (all of which are considered major urban districts) had the highest average dropout rate, at 2.1 percent. However, districts with enrollments under 500 did not have the lowest dropout rate. The annual dropout rates for these small districts averaged 1.6 percent, compared to 0.8 percent in 1995-96. The State Board of Education approved 16 open-enrollment charter schools for operation during 1996-97. Charter schools are subject to fewer state laws than other public schools, and most are specifically designed to serve students at risk of academic failure or dropping out. As these schools are not part of existing districts, their data were examined separately in this analysis. The overall annual dropout rate for this group was 10.9 percent. Given the distinctly different characteristics of the students served by charters, compared with the state as a whole, their relatively higher dropout rate is not unexpected.

Appendix A also shows dropout rates among school districts based on student performance. Districts are grouped according to the percentage of students passing all Texas Assessment of Academic Skills (TAAS) tests taken. As the percentage of students passing all TAAS tests increases, the dropout rate decreases. The 210 districts with under 67.4 percent of their students passing all TAAS tests taken in 1996-97 had an average dropout rate of 2.1 percent, compared to 0.6 percent in districts with at least 84.4 percent of students having passed the TAAS.

The resources of school districts and campuses have been considered a factor in the ability to supply needed support services for students at risk of dropping out of school. School districts with average and below average operating costs per pupil serve a large proportion of the state's total enrollment and generally a large percent-

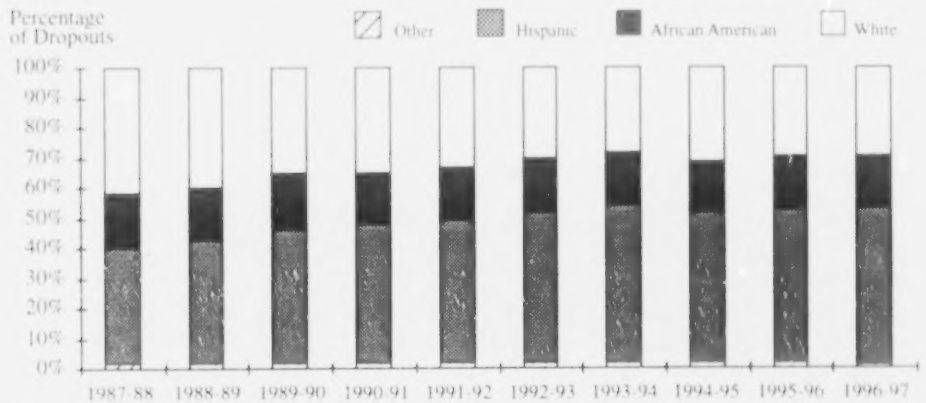
age of the total dropouts. In 1996-97, school districts with the highest operating costs per pupil had the lowest dropout rate, at 0.9 percent, and those with just above average operating costs per pupil had the next lowest dropout rate (1.3%). Close behind were districts with the lowest operating costs, showing the third lowest dropout rate at 1.4 percent. The rate for this group of districts was unchanged from 1995-96.

Trends in State Dropout Rates

Between 1987-88 and 1996-97, the number of reported dropouts declined steadily by more than 70 percent (see Table 8 on page 15). Improvements to school district student tracking systems probably contributed to some of the reduction in identified dropouts during the first few years of dropout data collection. The 1990-91 and 1992-93 reductions also reflect, in part, enhancements to the statewide dropout recovery system. The significant decline in the number of dropouts reported in 1994-95 can be partially attributed to changes in the dropout definition and recovery system, such as not including in the count seniors who fail exit-level TAAS but pass all other graduation requirements. Significant reductions are also attributed to the response of students, parents, and educators to use of the dropout rate as a performance indicator in the state accountability system. In 1996-97, both the number of dropouts (26,901) and the statewide annual rate (1.6%) dropped slightly, relative to results in 1995-96.

Minority students have comprised a higher percentage of total dropouts than of enrollment since the 1987-88 school year. As Figure 1 shows, Hispanic students have made up the greatest percentage of dropouts since 1988-89. Overall, the percentage of total dropouts represented by African American students declined by

Figure 1. Texas Percentage of Total Dropouts by Ethnicity



Source: TEA PEIMS (1987-88 – 1997-98)

close to 1 percent from 1995-96, whereas the percentage represented by Hispanic students increased slightly.

Figure 2 shows the percentage of dropouts by grade level from the 1987-88 school year to the 1996-97 school year. While students in the ninth grade consistently represent the largest number of dropouts (i.e., the highest percentage of total dropouts), students in the 12th grade are steadily increasing as a percentage of total dropouts, with the exceptions of 1989-90 and 1994-95. In 1987-88, students in the 12th grade represented almost 12 percent of all dropouts, while in 1996-97 they represented almost 20 percent of all dropouts. The current percentage represents an increase of approximately 60 percent over the 12th grade dropout rate of 10 years ago. Twelfth graders also had the highest annual dropout rate in 1996-97, at 2.5 percent (see Table 2 on page 6). Between 1992-93 and 1996-97, the greatest declines in numbers of dropouts occurred in the 9th, 10th and 11th grades, while the numbers of dropouts in Grades 7 and 8 began to stabilize.

Projected Cross-Sectional and Longitudinal Dropout Rates

Texas Education Code, §39.182, requires TEA to calculate five-year projections of cross-sectional and longitudinal dropout rates for Grades 7-12, with the assumption that no state action is taken to reduce the dropout rate. Projected dropout rates by grade level are calculated by applying the current year ethnic dropout rates to the population for each ethnic group within grade level as current grade levels are incremented for each projected year. That is, the first step in determining the

projected 1997-98 rate is to represent all students who were in Grades 6-11 in 1996-97 as 7th-12th graders for 1997-98. The 1996-97 ethnic dropout rates are applied within each incremented grade level and then summed to yield the projected rates for 1997-98. For the next projected year, 1998-99, the same process is now applied to 5th-10th graders who have progressed to Grades 7-12. This method continues for each cohort through the year 2002-03 and is based on the assumption that current ethnic dropout rates will remain constant from year to year.

Table 9 shows the projected grade level (cross-sectional) and longitudinal dropout rates for Texas. Grade level dropout rates continue to reflect higher dropout rates in the 10th and 12th grades. The current longitudinal rate of 9.1 percent remains fairly steady before the year 1999-2000 and slightly increases thereafter through the year 2002-03.

An Update to the National Dropout Rate

NCES, with representatives from state and local education agencies and professional associations, developed a definition of "dropout" that could be adopted and implemented by all states. In 1992-93, NCES began collecting dropout data under the new definition through the Common Core of Data (CCD). The CCD is a standard set of data that NCES collects from every state annually. As of the 1994-95 school year, 29 states and the District of Columbia had submitted data that met quality and comparability standards required to publish state estimates. Table 10 presents preliminary estimates of 1994-95 dropout rates, as reported by NCES (McMillen & Kaufman, 1997).

Table 9. Texas Projected Dropout Rates by Grade

Cross-Sectional Rates by Grade	1996-97	1997-98	1998-99	1999-00	2000-01	2001-02	2002-03
7	0.3%	0.2%	0.2%	0.2%	0.2%	0.2%	0.3%

As indicated in Table 10, Texas had a national comparison dropout rate of 2.7 percent in 1994-95. This rate was higher than our reported state rate of 1.8 percent, primarily due to differences in the dropout definitions and methodologies used by

Table 10. NCES National Comparison Dropout Rates for States With Data (Grades 9-12, 1994-95*)

State	Dropout Rate	State (descending order)	Dropout Rate

* National comparison dropout rates are based on the Common Core of Data (CCD) universe collection.

** This rate was higher than the reported state rate of 1.8 percent, primarily due to differences in the dropout definitions and methodologies used by NCES and the State of Texas.

NCES and the state of Texas. The state's methodology is more comprehensive in nature, likely reflecting availability of more data than in other states. For example, fall "snapshot" enrollment data are required for the NCES methodology, while Texas has the capacity to examine attendance over the course of the full school year. Such information cannot be accommodated by NCES because it would preclude comparability of the resulting dropout rates. It is worth noting that the national comparison rate for Texas was the second lowest on the list of 29 states, considerably below that for California (a state with similar demographics).

National Annual Rates

NCES publishes national annual and longitudinal dropout rates based on survey data. The surveys provide a consistent picture of national and regional dropout rates over time. However, the rates are not consistent with those calculated for Texas, and the surveys do not employ samples large enough to provide state-representative findings (Hoffman, 1995).

The national annual rates based on the Current Population Survey conducted by the U.S. Census Bureau are presented in Table 11. Dropouts are defined as those 15- through 24-year-olds not currently enrolled in school, who were enrolled a year ago.

Table 11. National Dropout Rates for Grades 10-12 as of October 1996

	Total Dropouts (Thousands)	Percent of Total Dropouts	Annual Dropout Rate
White	267	54.9%	4.1%

Note: Details may not add to totals because of rounding.

and are not high school graduates. From these data, NCES estimates the total number of dropouts nationally for Grades 10-12.

As of October 1996, an estimated 5 percent of students in Grades 10-12 dropped out of school, representing almost one-half million students. Table 11 presents national dropout rates by ethnicity, gender, and age. The highest dropout rates are found among Hispanic students and students aged 20-24 years old.

National Longitudinal Rates

With the National Education Longitudinal Study of 1988 (NELS:88), NCES began surveying eighth grade students. The survey follows the progress of these students as they continue to postsecondary education or enter the labor force. The cohort of eighth graders in the survey was scheduled to graduate at the end of the 1991-92 school year. Following the 1988 base year data collection, these students were interviewed every two years through 1994. Based on information from interviews conducted the last year, 89 percent of the cohort had completed regular high school programs by the summer of 1992. In addition, 2.5 percent had completed alternative credentials, 0.1 percent had received certificates of attendance, and 5.5 percent were still enrolled in high school programs of some type.

Dropout Prevention Strategies

As Table 7 on page 11 shows, students drop out for many reasons, and rarely is the decision to leave a snap judgment. The literature views dropping out of school as a process that begins with a student "withdrawing or disengaging" from school and then finally dropping out (Hahn, Danzberger, & Lefkowitz, 1987; Tomlinson, Frase, Fork, & Gonzalez, 1994). Sometimes this disengagement begins in the early grades (elementary or middle school), with the student finally dropping out in high school. To fully comprehend the dropout process, one would have to simultaneously examine the personal life of the student, the school and its local policies and practices, and the state and federal policies that shape the social and educational views of the nation.

Although it is difficult to determine the exact time a student decides to drop out of school, most prevention programs are implemented at the high school level. Even though not all dropouts are identified as at risk of dropping out (in Texas, for example, fewer than 40 percent of all 1996-97 dropouts were identified that year as being at risk, using criteria set in law) the majority of dropout prevention efforts across the nation are aimed at students with certain attributes associated with "at risk" status (Hahn, Danzberger, & Lefkowitz, 1987; Tomlinson, Frase, Fork, & Gonzalez, 1994). These attributes commonly include (a) minority status, (b) low income status, (c) low academic achievement, and (d) pregnancy.

Prevention programs can vary tremendously in terms of the populations being targeted for services, in the scope and kinds of services offered, and the service delivery mechanisms used. Most of the literature concerning dropout prevention involves evaluations of specific programs to answer the question "Did this program work?" rather than "Why did this program work?" (O'Sullivan, 1990; Paredes, 1996; Wilkinson & Griffith, 1994; and Wilkinson & Mangino, 1994). However, examining successful programs permits identification of strategies commonly employed to deter students from dropping out (Cardenas, Robledo, & Supik, 1986; Duckenfield, Hamby, & Smink, 1990; Hahn, Danzberger, & Lefkowitz, 1987; Ramirez, 1990). These strategies include the following.

- **Individualized instruction.** Individualized instruction in dropout prevention programs capitalizes on students' unique learning styles and interests and allows them to learn at their own pace and ability level.

- **Remediation and/or accelerated instruction.** Successful dropout prevention programs remediate students in basic academic skills and/or bring students up to grade level by the end of the program.

- **Mentorship and counseling.** One of the most effective strategies for a successful dropout prevention program is one-to-one involvement with a mentor. Mentors serve as role models by providing the necessary adult attention and support that will encourage the student to finish school and plan for the future.

- **Flexibility in programming and scheduling.** Dropout prevention programs serve a diverse population with diverse needs. Therefore, they are flexible about course sequences, course length, classroom structure, and class schedules.

- **Trained and committed staff.** Successful dropout prevention programs are staffed by individuals who are committed to at-risk teens and are dedicated to program plans and goals. Staff are also trained in tailoring instruction to meet individual student needs.

- **Parental involvement.** Successful dropout prevention programs have the support of the parent as a mentor and tutor for the child, as well as to the teacher and school.

- **Collaboration with the community and businesses.** Successful dropout prevention programs collaborate with the community and local businesses. Developing company mentorship programs with at-risk students links the importance of graduation and future employment opportunities.

- **Matching services to needs.** Successful dropout prevention programs work with other governmental agencies to assure students' access to appropriate social services for their immediate needs, so that students in turn can concentrate on finishing school. These services can range from accessing employment-related benefits, to income assistance and day-care services for teenage parents.

Although these strategies show up repeatedly in successful dropout prevention programs, other programs have used additional strategies that have had a positive impact on the dropout rate in communities across the nation, with an apparent "key" being the match between students' needs and local school/community circumstances. Some of these include offering work study programs, implementing year-round schools, offering rewards or incentives, and providing transportation to the program. Other prevention strategies have targeted special groups, such as limited English proficient students, or have provided quality early childhood education, which helps better prepare children for school (Duckenfield, Hamby, & Smink, 1990; Vaznaugh, 1995).

Because dropping out of school can be such a complex process, influenced by a student's ethnicity, socioeconomic status, home life, and academic history, it is important that a school or district first assess the profile of their dropouts before establishing prevention and recovery programs.

Appendix A
TEXAS EDUCATION AGENCY
1996-97 DISTRICT ANALYZE CATEGORY DESCRIPTIONS

ENROLLMENT
A nine-category grouping based on the total number of students enrolled by district as of the Public Education Information Management System (PEIMS) fall collection date (late October of each year). Enrollment excludes students who are served but not enrolled by districts.

DISTRICT TYPE
Classification of school districts based on factors such as size, growth rates, and proximity to urban areas is listed below. The charter school districts are in a separate category.

Major Urban. The state's largest metropolitan districts serving the Houston, Dallas, San Antonio, Fort Worth, Austin, and El Paso areas.

Major Suburban. Other districts in and around the major urban areas.

Other Central City. Major districts in other large Texas cities.

Other Central City Suburban. Other districts in and around the other large, but not major, Texas cities.

Independent Town. Largest districts in counties with populations of 25,000 to 100,000.

Non-Metro: Fast Growing. Districts not fitting in any of the above categories but exhibiting a five-year growth rate of at least 20 percent with at least 300 students enrolled.

Non-Metro: Stable. Districts not fitting in any of the above categories but with an enrollment exceeding the state median.

Rural. Districts not fitting in any of the above categories; districts either with an enrollment between 300 and the state median and a growth rate less than 20 percent, or with an enrollment less than 300.

Charter Schools. The 16 open-enrollment schools chartered by the State Board of Education for operation during 1996-97. Charter schools operate in facilities of commercial or nonprofit entities or school districts.

PROPERTY WEALTH
Total taxable property value divided by enrollment, which indicates district ability to raise local funds on a per pupil basis. The property value used is total taxable value for the last completed calendar year—i.e., 1996, as determined by the Comptroller's Property Tax Division (CPTD). Enrollment is for the 1996-97 school year. The first wealth grouping shows 10 categories; the second simply shows districts above and below state average wealth; the third is a 20-category grouping, with each category representing about five percent of the state's students. The six special statutory and 16 charter school districts without taxable property wealth form a separate group in all three wealth groupings.

TOTAL TAX EFFORT
A four-category tax effort grouping of districts defined by the total effective tax rate, which was determined by dividing the last completed calendar year's total levy amount by that year's CPTD total taxable property value. The total effective rate is the sum of the school district maintenance and operations (M&O) rate, and the interest and sinking fund standardized rate. Rates are expressed per $100 of taxable value. The six special statutory and 16 charter school districts without property tax levies appear separately.

MAINTENANCE AND OPERATIONS EFFECTIVE TAX RATES
A four-category tax effort grouping of districts showing the M&O effective tax rate, which was determined by dividing the last completed calendar year's M&O levy amount by that year's CPTD total taxable property value. The M&O rates shown include the local standardized rate and money generated by districts for equalizing wealth. The six special statutory and 16 charter school districts without property tax levies appear separately.

HIGHEST PROPERTY VALUE CATEGORY
A CPTD classification based on property use. Thirteen CPTD categories are aggregated into four categories as follows:

Residential. Single-family, multi-family, and residential inventory.

Land. Vacant lots and rural real property (taxable).

Oil and Gas. Oil, gas, and minerals.

Business. Commercial and industrial real property, commercial and industrial personal property, and utilities.

A district is placed into one of the four preceding categories that represents its greatest total property value. The six special statutory and 16 charter school districts without taxable property wealth form a separate group.

SMALL/SPARSE ADJUSTMENT
A four-category grouping of districts based on the small/sparse adjustment amount as a percent of the total adjusted basic allotment amount. A fifth category contains all districts receiving no small/sparse adjustment. This percentage represents the extent to which state funding is adjusted to compensate for small and/or sparsely populated districts.

COST OF EDUCATION INDEX LEVEL
A five-category grouping of districts based on the Cost of Education Index (CEI) level. It reflects geographic variations in costs and prices outside district control. The current index, which has a minimum value of 1.0 and a maximum of 1.2, was implemented in 1991-92.

OPERATING COST PER STUDENT
A five-category grouping of districts based on operating cost per student. Operating costs are the sum of all expenditures budgeted for the operation of the district for all funds. The operating expenditures are a subset of the total expenditures; they do not include debt service, capital outlay, or ancillary services expenditures. Per student amounts are the school year expenditures divided by enrollment. The source for budgeted expenditures is the fall PEIMS submission.

EDUCATION SERVICE CENTER REGION
The state is divided into 20 geographic regions; districts within each region are served by an Education Service Center.

TAAS: PERCENT PASSING ALL TESTS TAKEN
A five-category grouping of districts based on the percentage of students passing the Texas Assessment of Academic Skills (TAAS). For Grades 3-8 and 10, the total number of students passing all sections taken of the TAAS is expressed as a percentage of the total number of students taking one or more tests. This percentage (a) excludes special education students, and third and sixth graders taking the test in Spanish; and (b) includes only those students in the district in October of the school year, which is the percentage used for accountability purposes. A sixth category refers to districts not administering the test.

SAT I/ACT: PERCENT TAKING
A three-category grouping based on the percentage of 1995-96 graduates taking the SAT I and/or the ACT assessment. A fourth category is reserved for districts that had no graduates.

SAT I/ACT: PERCENT SCORING AT OR ABOVE CRITERION
A five-category grouping based on the percentage of 1995-96 examinees who scored at or above the criterion (1110 on the SAT I Total and/or 24 on the ACT Composite) on the SAT I and/or ACT. The number meeting the criterion is divided by the number of examinees. A sixth category is reserved for districts that had no examinees.

STUDENT DENSITY

A four-category grouping based on density, or the number of students enrolled per square mile. District square miles were determined through a joint effort by the State Property Tax Board (SPTB, now the CPTD), the Texas Education Agency, and the Texas Water Commission (TWC). Maps provided by districts to the SPTB were digitized by TWC to determine acreage. The six special statutory and 16 charter school districts without available mileage information form a separate group.

ENROLLMENT CHANGE FROM PRIOR YEAR

A five-category grouping based on the growth or decline in district student population over a one-year period. Districts with declining enrollment represent one category, while the remaining categories show one-year growth rates ranging from "0%-3%" to "10% and over."

PERCENT AFRICAN AMERICAN, HISPANIC, AND MINORITY STUDENTS

Three six-category sets of groupings based on the ethnic composition of district student populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-White populations expressed as a percentage of the total. Non-White populations include American Indian or Alaskan Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic.

PERCENT ECONOMICALLY DISADVANTAGED STUDENTS

A six-category grouping based on the percentage of students enrolled in the district who are classified as economically disadvantaged on PEIMS as follows:

a) eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
b) from a family with an annual income at/below the federal poverty line;
c) eligible for AFDC or other public assistance;
d) recipient of a Pell Grant or comparable state need-based financial assistance program; or
e) eligible for programs assisted under Title II of the Job Training Partnership Act.

AVERAGE TEACHER EXPERIENCE

A four-category grouping of average teacher experience years computed as the total professional experience years for each district teacher multiplied by each teacher's full-time-equivalent (FTE) count, followed by summing these products for the whole district, and dividing by the total teacher FTE count.

AVERAGE TEACHER SALARY

A four-category grouping by average district teacher salary computed as the total salary of teachers divided by the total teacher FTE count. Total salary amount does not include any other supplement.

PERCENT MINORITY TEACHERS

A six-category grouping based on the minority composition of district teaching populations. Minority percentage is calculated by summing all non-White teacher FTEs and dividing by the total teacher FTEs.

PERCENT TEACHERS WITH ADVANCED DEGREES

A four-category grouping by district percentage of teachers with advanced degrees computed as the FTE count of teachers with a master's or doctoral degree divided by the total teacher FTE count.

Make check or money order payable to:
Texas Education Agency

COMPLIANCE STATEMENT

TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

(1) acceptance policies on student transfers from other school districts;

(2) operation of school bus routes or runs on a nonsegregated basis;

(3) nondiscrimination in extracurricular activities and the use of school facilities;

(4) nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;

(5) enrollment and assignment of students without discrimination on the basis of race, color, or national origin;

(6) nondiscriminatory practices relating to the use of a student's first language; and

(7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

TITLE VII, CIVIL RIGHTS ACT OF 1964 AS AMENDED BY THE EQUAL EMPLOYMENT OPPORTUNITY ACT OF 1972; EXECUTIVE ORDERS 11246 AND 11375; EQUAL PAY ACT OF 1964; TITLE IX, EDUCATION AMENDMENTS; REHABILITATION ACT OF 1973 AS AMENDED; 1974 AMENDMENTS TO THE WAGE-HOUR LAW EXPANDING THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967; VIETNAM ERA VETERANS READJUSTMENT ASSISTANCE ACT OF 1972 AS AMENDED; IMMIGRATION REFORM AND CONTROL ACT OF 1986; AMERICANS WITH DISABILITIES ACT OF 1990; AND THE CIVIL RIGHTS ACT OF 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Opportunity/Affirmative Action employer.
